ANALYTICS[®]

GLOBAL LEADER IN ADVANCED TECHNOLOGY TRAINING

DUAL CERTIFICATE PROGRAM IN

**DATA SCIENCE AND
ARTIFICIAL INTELLIGENCE**

**#1 ANALYTICS
TRAINING INSTITUTE**

RANKED BY BUSINESS WORLD, BRITISH COLUMBIA TIMES,
BUSINESS STANDARD, AVALON GLOBAL RESEARCH, IFC
AND SEVERAL RECOGNIZED FORUMS.

www.bostoninstituteofanalytics.org

Boston Institute of Analytics - Empowering Minds, Transforming Futures.

Boston Institute of Analytics is the world's top ranked analytics training institute that imparts training in data science, machine learning, business analytics, artificial intelligence, and other emerging advanced technologies to students and working professionals via classroom training conducted by industry experts. With training campuses across US, UK, Europe and Asia, BIA® has training programs across the globe with a mission to bring quality education in emerging technologies.

BIA® is driven by industry's top technology & management experts from across the world. Our team of experts and advisors have highly specialized knowledge across data analytics, machine learning, predictive analytics, and advanced technologies. BIA courses are designed to train students and professionals on industry's most widely sought after skills, and make them job ready in technology and business management field.

BIA® has been consistently ranked number one analytics training institute by Business World, British Columbia Times, Business Standard, Avalon Global Research, IFC and Several Recognized Forums. Boston Institute of Analytics classroom training programs have been recognized as industry's best training programs by global accredited organizations and top multi-national corporates.

Top Enrolled BIA® Courses

DATA SCIENCE & ARTIFICIAL INTELLIGENCE

CYBER SECURITY & ETHICAL HACKING

INVESTMENT BANKING & FINANCIAL ANALYTICS

BUSINESS MANAGEMENT & ANALYTICS

And Many More...

Key Highlights

INDUSTRY APPROVED CURRICULUM

Courses designed and developed by top industry professionals.

LEARN FROM SCRATCH, OR NOT!

Depending on your current expertise level, choose Core or Advanced module.

HANDS-ON TRAINING

You cannot master a language without speaking it.

100% PLACEMENT ASSISTANCE

Access to jobs and internships from partner companies, resume building, interview prep and soft skills training.

BECOME INDUSTRY READY

Work on real industry case studies.

UNIFIED LEARNING

Explore the benefits of both classroom & online learning.

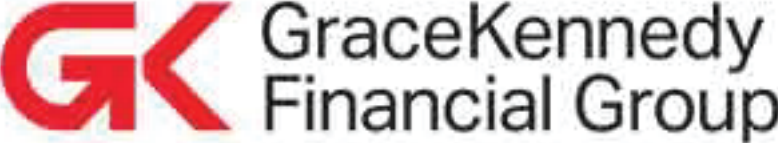

LEARN FROM EXPERIENCED INDUSTRY PROFESSIONALS

Professionals know what to prepare you for.

BIA[®] Alumni Working With Top Global Companies

Mode of Learning

CLASSROOM

ONLINE

BIA[®] has a **CLASSROOM + ONLINE** training pattern where students have the flexibility to attend the sessions IN CLASSROOM as well as ONLINE. BIA[®] Trainers conduct the training sessions live from BIA[®] Classrooms. All BIA[®] sessions are live streamed for students from that batch, thus enabling students to attend the same sessions ONLINE and interact with the Trainer as well as other students.

Skill-Sets Covered

**DATA ANALYTICS/
BUSINESS ANALYTICS**

DATA VISUALIZATION

**MACHINE LEARNING
ALGORITHMS**

STATISTICS

ENSEMBLE TECHNIQUES

**NATURAL LANGUAGE
PROCESSING**

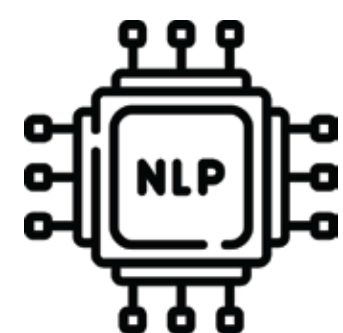

FORECASTING ANALYTICS

GENERATIVE AI

Tools & Technologies You Will Learn

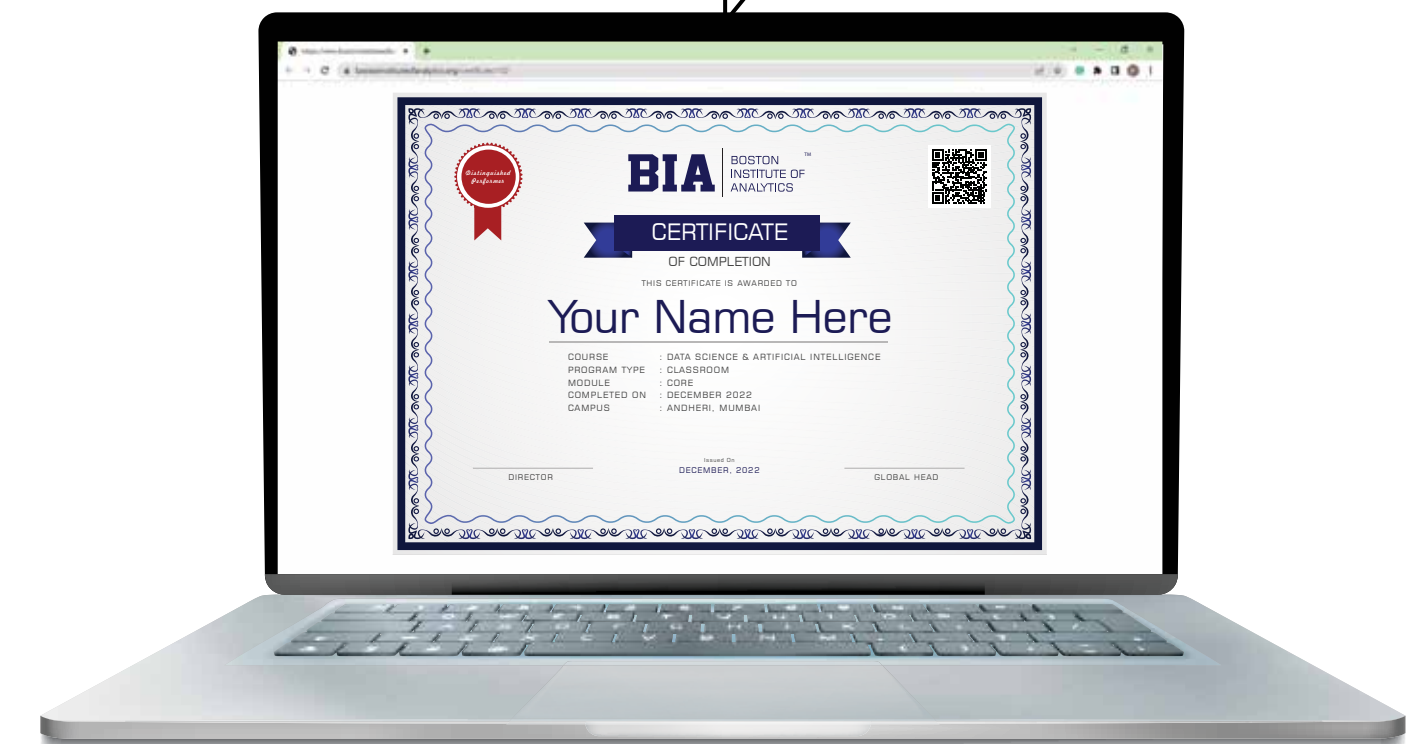

Prerequisite Knowledge: NO
Education Background: ANY

International Certification Right Here In India!

All our certificates are validated with
a unique authorization QR code.

Know Your Future As Data Scientist & AI Professional

Job Roles You Can Apply For

DATA SCIENTIST

**MACHINE LEARNING

Diploma Program Fee **Includes 2 Months Internship**

₹1,12,000

Master Diploma Program Fee **Includes 6 Months On-Job Training as Data Scientist**

₹1,55,000

**GST INCLUDED
NO COST EMI AVAILABLE**

DUAL CERTIFICATION

IN TWO MOST IN-DEMAND AND HIGHLY PAID SKILLS

DATA SCIENCE

+

ARTIFICIAL INTELLIGENCE

DATA SCIENCE & ARTIFICIAL INTELLIGENCE

CORE MODULE

Learn from scratch the key concepts of Analytics and get trained on modelling techniques, with a focus on Python/R computing, machine learning, statistical concepts, BI dashboarding tools, and their real world business applications.

CERTIFICATION

4 Months

(100 HOURS WEEKEND COURSE)

INDUCTION

- Explore Data Science Opportunities
- Gain Career-Ready Skills
- Software Installation
- **Practical Exercise:** Set up the required software tools and environment (Anaconda, Jupyter, etc.) on your computer.

ADVANCED EXCEL

- Pivot Tables for Data Summarization
- Data Analysis and Visualization
- Data Linking for Comprehensive Reports
- **Practical Exercise:** Create a Pivot Table and build advanced charts to analyze data from different angles.

DIPLOMA

6 Months

(100 HOURS WEEKEND COURSE) +
(2 MONTHS PROJECT INTERNSHIP)

MASTER DIPLOMA

10 Months

(100 HOURS WEEKEND COURSE) + (6 MONTHS ON-JOB TRAINING AS DATA SCIENTIST)

FUNDAMENTALS OF EXCEL

- Master Data Cleaning Techniques
- Visualize Data with Excel Charts
- Efficient Subtotaling and Analysis
- **Practical Exercise:** Clean and analyze a provided dataset using Excel's basic functions and charts.

PYTHON FUNDAMENTALS

- Python Basics and Operators
- Control Flow with Conditional Statements
- Python Data Types and Structures
- **Practical Exercise:** Write Python code to solve simple programming problems, focusing on variables and operators.

DATA SCIENCE & ARTIFICIAL INTELLIGENCE

LOOPS & FUNCTIONS IN PYTHON

- Iterate with Loops in Python
- Create and Use Python Functions
- Advanced Data Manipulation with Lambda
- [Practical Exercise: Implement loops and functions to perform tasks such as data processing and automation.](#)

DATA MANIPULATION WITH PANDAS & DATA VISUALIZATION

- Master Pandas Data Structures
- Explore Data and Visualize Insights
- Introduction to Version Control with Git
- [Practical Exercise: Load and explore a dataset using Pandas, and create basic data visualizations using Matplotlib and Seaborn.](#)

ADVANCED SQL CONCEPT & DATA MANIPULATION

- Temporary Tables and Documentation
- Aggregations and Grouping Data
- Advanced SQL Operations and Joins
- [Practical Exercise: Perform more complex SQL operations, such as joining and aggregating data.](#)

NUMPY FUNDAMENTALS

- Work with NumPy Arrays
- Efficient Indexing and Slicing
- Filtering and Boolean Indexing
- [Practical Exercise: Work with NumPy arrays to perform basic array operations, indexing, and filtering.](#)

INTRODUCTION TO SQL & BASIC QUERYING

- SQL for Data Retrieval
- Data Modeling Fundamentals
- Advanced Data Sorting and Filtering
- [Practical Exercise: Write SQL queries to retrieve and manipulate data from a sample database.](#)

FUNDAMENTALS OF STATISTICS & PROBABILITY

- Understand Data Types
- Central Tendency and Variance
- Probability and Distribution Basics
- [Practical Exercise: Calculate mean, median, variance, and standard deviation for a dataset.](#)

DATA SCIENCE & ARTIFICIAL INTELLIGENCE

ADVANCED STATISTICS & HYPOTHESIS TESTING

- Hypothesis Testing Techniques
- Interpret Data Visualizations
- Correlation, Regression, and ANOVA
- [Practical Exercise: Perform hypothesis tests and analyze real datasets using statistical techniques.](#)

MULTIPLE LINEAR REGRESSION & MODEL EVALUATION

- Evaluate Models with MAE, MSE, RMSE
- Multiple Linear Regression
- Practical Model Evaluation with Real Data
- [Practical Exercise: Build and evaluate a multiple linear regression model using a real-world dataset.](#)

DECISION TREES AND ENSEMBLE METHODS

- Understand Decision Trees
- Prevent Overfitting and Tree Pruning
- Explore Random Forest and Gradient Boosting
- [Practical Exercise: Create decision tree models and explore the power of ensemble methods.](#)

INTRODUCTION TO MACHINE LEARNING AND REGRESSION BASICS

- Dive into Machine Learning
- Data Preprocessing Essentials
- Linear Regression for Predictive Modeling
- [Practical Exercise: Implement a simple linear regression model and evaluate its performance.](#)

LOGISTIC REGRESSION AND CLASSIFICATION METRICS

- Master Logistic Regression
- Classification Metrics for Model Assessment
- ROC Curves and Model Performance
- [Practical Exercise: Train and evaluate logistic regression models for binary and multiclass classification problems.](#)

MODEL EVALUATION AND VALIDATION TECHNIQUES

- K-Fold Cross-Validation
- Hyperparameter Tuning
- In-Depth Classification Metrics
- [Practical Exercise: Apply K-fold cross-validation and hyperparameter tuning to improve model performance.](#)

DATA SCIENCE & ARTIFICIAL INTELLIGENCE

UNSUPERVISED LEARNING

- Discover K-Means Clustering
- Hierarchical Clustering Techniques
- Clustering for Data Insights
- [Practical Exercise: Implement K-Means clustering and hierarchical clustering on real data.](#)

SUPPORT VECTOR MACHINES (SVM) AND K-NEAREST NEIGHBORS (KNN)

- Classification with SVM
- K-Nearest Neighbors for Predictions
- Choose K and Distances
- [Practical Exercise: Build and evaluate SVM and KNN models for classification problems.](#)

TIME SERIES MODELING WITH ARIMA AND SARIMA

- Understand Time Series Data
- Build ARIMA and SARIMA Models
- Practical Forecasting and Model Evaluation
- [Practical Exercise: Analyze and forecast time series data using ARIMA and SARIMA models.](#)

DIMENSIONALITY REDUCTION AND FEATURE SELECTION

- Reduce Dimensionality Effectively
- Principal Component Analysis (PCA)
- Feature Engineering for Improved Models
- [Practical Exercise: Apply PCA for dimensionality reduction and feature engineering to enhance model performance.](#)

ADVANCED ENSEMBLE LEARNING

- Bagging, Stacking, and Blending
- Explore Advanced Ensemble Algorithms
- Harness the Power of XGBoost and LightGBM
- [Practical Exercise: Implement bagging, stacking, and advanced ensemble algorithms like XGBoost and LightGBM on a dataset.](#)

INTRODUCTION TO DEEP LEARNING

- Overview of Artificial Neural Networks
- Basic Deep Learning Concepts
- Build and Train Simple Neural Networks
- [Practical Exercise: Build and train a simple neural network on a dataset using popular deep learning frameworks.](#)

DATA SCIENCE & ARTIFICIAL INTELLIGENCE

DEEP LEARNING ARCHITECTURES AND TRAINING

- Dive into CNNs and RNNs
- Train Deep Learning Models
- Avoid Overfitting with Regularization
- [Practical Exercise: Create and train Convolutional Neural Networks \(CNNs\) and Recurrent Neural Networks \(RNNs\) for various tasks](#)

MODEL DEPLOYMENT

- Understand Model Deployment
- Set Up Deployment Environment
- Secure, Monitor, and Optimize Deployed Models
- [Practical Exercise: Deploy a machine learning model as a web API and monitor its performance.](#)

TEXT GENERATION WITH RECURRENT NEURAL NETWORKS (RNNs)

- Introduction to Text Generation
- Best Practices to Review Creative Text generation
- Common Issues in Training RNNs
- [Practical Exercise: Building a text generator using RNNs](#)

NATURAL LANGUAGE PROCESSING (NLP)

- Master NLP Essentials
- Preprocess Text Data
- Create Text Classification Models
- [Practical Exercise: Perform text preprocessing and build a text classification model using NLP techniques.](#)

INTRODUCTION TO GENERATIVE AI

- Types of Generative Models
- Understanding Generative Adversarial Networks (GANs)
- Understanding Variational Autoencoders (VAE)
- [Practical Exercise: Setting-up Python Environment and Deep Learning Libraries](#)

INTRODUCTION TO TRANSFORMERS

- RNN Vs Transformer Models
- Overview of GPT-2 and BERT
- NLP Applications and Text Generation with Transformers
- [Practical Exercise: Build a Language Model using GPT-2](#)

DATA SCIENCE & ARTIFICIAL INTELLIGENCE

POWER BI

- Introduction to Power BI
- Data Transformation and Modeling
- Create Interactive Dashboards
- [Practical Exercise: Transform data and create interactive dashboards in Power BI using real-world datasets.](#)

INTRODUCTION TO R

- Get Started with R
- Work with Variables and Data Types
- Handle Data Frames and Apply Functions
- [Practical Exercise: Perform data manipulation and analysis in R, including creating custom functions.](#)

TABLEAU

- Explore Tableau Prep and Desktop
- Visual Analytics and Calculations
- Design Engaging Dashboards
- [Practical Exercise: Develop visualizations and dashboards in Tableau based on provided data.](#)

ADVANCED R PROGRAMMING

- Data Frames and Custom Functions
- Master Apply Functions
- Work with Dates and Times in R
- [Practical Exercise: Utilize apply functions, handle dates and times, and work with data frames in R](#)

From Data to Insights: Boston Institute of Analytics Ignited My Passion for Business Analytics!

Boston Institute of Analytics ignited my passion for business analytics and empowered me to uncover meaningful insights from data. The program's hands-on approach, industry-relevant projects, and expert guidance allowed me to develop a strong analytical skill set. Thanks to BIA, I am now leveraging data to drive business growth and make informed decisions.

Transforming Data into Strategy: Boston Institute of Analytics Catapulted My Business Analytics Career!

Boston Institute of Analytics has been a game-changer in my business analytics career. The program's comprehensive curriculum, combined with hands-on projects and industry case studies, prepared me to analyze complex datasets and derive meaningful insights. With BIA's training, I am now leading data-driven strategies and helping businesses gain a competitive advantage in the market.

Fueling Curiosity with Data: Boston Institute of Analytics Ignited My Passion for Analytics!

Boston Institute of Analytics provided me with an immersive learning experience that fueled my curiosity and passion for data science. The program's emphasis on real-world applications and practical projects gave me the confidence to tackle complex data challenges. With BIA's comprehensive training and supportive community, I have transformed into a skilled data scientist, ready to make a positive impact in the industry.

Transforming Data into Action: Boston Institute of Analytics Equipped Me for Business Analytics Success!

Boston Institute of Analytics equipped me with the skills and knowledge to transform data into actionable insights. The program's emphasis on data analysis techniques, statistical modeling, and data visualization enabled me to effectively communicate complex findings to stakeholders. With BIA's comprehensive training, I am now helping businesses make informed decisions based on data-driven evidence.

Mastering the Art of Data Science: Boston Institute of Analytics Made It Possible!

Boston Institute of Analytics played a pivotal role in my journey to master the art of data science. The program's comprehensive curriculum, combined with hands-on exercises and industry case studies, provided me with a solid foundation. The dedicated faculty members and personalized guidance helped me overcome challenges, and I am now equipped with the skills to excel in any data science role.

A Stepping Stone to Success: Boston Institute of Analytics Opened Doors for Me!

Boston Institute of Analytics played a pivotal role in launching my career in the data science industry. The program's emphasis on practical skills, including data visualization and model building, prepared me for real-world challenges. Additionally, BIA's career services team provided valuable networking opportunities and interview preparation, which ultimately led me to secure my dream job as a data scientist.

Empowering Business Analysts: Boston Institute of Analytics Thrive in the Field!

Boston Institute of Analytics (BIA) is a leading institution dedicated to thriving in the field of business analytics. Our comprehensive program's comprehensive curriculum, coupled with industry-relevant expertise and expert mentorship, enable students to build a strong foundation in data analysis, statistical modeling, and machine learning. With BIA's support, students are now successfully applying advanced analytics techniques to drive business growth.

Access to Global Network of BIA® Advisory Council

**ASHWIN MALIK
MESHAM**

Managing Director of a US-based machine learning company, specializing in algorithm development for financial services. IIT Bombay alumnus.

Specialities :
Predictive Analytics, Machine Learning,
Artificial Intelligence

Domain Expertise :
Insurance, Retail, E-commerce, Banking,
Asset Management

PETER VIOLA

VP of Product and Implementation at a US-based machine learning and artificial intelligence company; Majored in Physics from Tufts University.

Specialities :
Scenario Planning Algorithms, M &
A Analytics, Operational Efficiency

Domain Expertise:
Insurance, Asset Management,
E-commerce

JAMES KERLEY

Managing partner at US based business transformation company, Ex-CMO at LIMRA LOMA.

Specialities :
Sales Analytics, Marketing, Strategy

Domain Expertise :
Insurance, Finance, Wealth Management

NIRAV DAGLI

CEO of a predictive analytics and artificial intelligence company based out of Boston. Ex-Partner at Oliver Wyman.

Specialities:
Financial Modelling, Algorithm Development,
Predictive Analytics

Domain Expertise:
Banking, Insurance, Asset Management,
Consumer Goods

XI ZHAO

Co-leading the Financial Literacy Initiative at Boston Private Industry Council, Member of 'President's Council' at Boston Children's Museum, Teaches Investment course at Clark University, CFA® Charter Holder, Boston University alumnus.

Specialities:
Econometrics, Risk Modelling,
Marketing Analytics

Domain Expertise:
Automobile, Banking, Insurance,
Asset Management

MICHAEL AGHA

Advisor at SPARK research program at Stanford University, Ex- Global Brand Strategy at Intel, Ex-Oliver Wyman, Wharton alumnus.

Specialities :
Corporate Strategies, Marketing Analytics,
Business Transformation

Domain Expertise :
Health Care & Life Sciences, Pharmaceutical,
Hard Tech

TONY BORDON

Managing Director of a global company specializing in analytics and insurance-based software; Board member of The Boston Children's Museum and BUILD.ORG. Ex-president of Institutional Initiatives with The Princeton Review. Ex-COO of Riverdeep Inc.

Specialities :
Marketing Analytics,
Sales Strategies

Domain Expertise :
Digital Media, Education,
Entertainment Publishing

**RISHIKESH
DESHPANDE**

CEO of a marketing and research analytics firm. Consultant to Fortune 1000 companies.

Specialities:
Marketing Analytics, Financial Modelling,
Predictive Analytics

Domain Expertise:
Retail, FMCG, Consumer Goods, Media,
Manufacturing, Telecom
